

CLAIM AMENDMENTS:

1. (Original) A blackout and thermal drapery lining comprising, in combination:
a metalized film having a first side and a second side;
a first layer of acrylic latex having a first side and a second side, said second side of said first layer of acrylic latex is coated to said first side of said metalized film; and
a second layer of acrylic latex having a first side and a second side, said first side of said second layer of acrylic latex is coated to said second side of said metalized film.
2. (Original) The blackout and thermal drapery lining of Claim 1 wherein said first side of said first layer of acrylic latex is flocked.
3. (Original) The blackout and thermal drapery lining of Claim 1 wherein said second side of said second layer of acrylic latex is flocked.
4. (Original) The blackout and thermal drapery lining of Claim 1 wherein said first side of said first layer of acrylic latex is flame retardant.
5. (Original) The blackout and thermal drapery lining of Claim 1 wherein said second side of said second layer of acrylic latex is flame retardant.
6. (Original) The blackout and thermal drapery lining of Claim 1 wherein said film is metalized with aluminum.
7. (Original) The blackout and thermal drapery lining of Claim 6 wherein said aluminum has an optical rating of between 1.5 and 4.0.

AMENDMENT

- 2 -

8. (Original) The blackout and thermal drapery lining of Claim 1 wherein said metalized film is metalized with a metal having a thickness of between .0002 to .03 millimeters.
9. (Original) The blackout and thermal drapery lining of Claim 1 wherein said film is polypropylene.
10. (Original) The blackout and thermal drapery lining of Claim 1 further comprising a drapery fabric coupled to said first side of said first layer of acrylic latex.
11. (Original) A blackout and thermal drapery comprising, in combination:
a metalized film having a first side and a second side;
a fabric having a first side and a second side, said second side of said fabric is coupled to said first side of said metalized film; and
a layer of acrylic latex having a first side and a second side, said first side of said layer of acrylic latex is coated to said second side of said metalized film.
12. (Original) The blackout and thermal drapery of Claim 11 wherein said second side of said layer of acrylic latex is flocked.
13. (Original) The blackout and thermal drapery of Claim 11 wherein said second side of said layer of acrylic latex is flame retardant.
14. (Original) The blackout and thermal drapery of Claim 11 wherein said metalized film is metalized with aluminum.

AMENDMENT

- 3 -

15. (Original) The blackout and thermal drapery of Claim 14 wherein said aluminum has an optical rating of between 1.5 and 4.0.
16. (Original) The blackout and thermal drapery of Claim 11 wherein said metalized film is metalized with a metal having a thickness of between .0002 to .03 millimeters.
17. (Original) The blackout and thermal drapery of Claim 11 wherein said film is polypropylene.
18. (Amended) A blackout and thermal drapery comprising, in combination:
a light impermeable metalized film having a first side and a second side;
a first layer of fabric having a first side and a second side, said second side of said first layer of fabric is coupled to said first side of said metalized film; and
a second layer of fabric having a first side and a second side, said first side of said second layer of fabric is coupled to said second side of said light impermeable metalized film.
19. (Amended) The blackout and thermal drapery of Claim 18 wherein said light impermeable metalized film is metalized with aluminum.
20. (Original) The blackout and thermal drapery of Claim 19 wherein said aluminum has an optical rating of between 1.5 and 4.0.
21. (Amended) The blackout and thermal drapery of Claim 18 wherein said light impermeable metalized film is metalized with a metal having a thickness of between .0002 to .03 millimeters.

AMENDMENT

- 4 -

22. (Original) The blackout and thermal drapery of Claim 18 wherein said film is polypropylene.
23. (Original) A method for manufacturing a blackout and thermal drapery lining, comprising, in combination, the steps of:
- providing a film having a first side and a second side;
 - metalizing said first side of said film and said second side of said film;
 - coating a first layer of acrylic latex to said first side of said metalized film;
 - and
 - coating a second layer of acrylic latex to said second side of said metalized film.
24. (Original) The method of Claim 23 further comprising the step of flocking said first layer of acrylic latex.
25. (Original) The method of Claim 23 further comprising the step of flocking said second layer of acrylic latex.
26. (Original) The method of Claim 23 further comprising the steps of:
- providing a fabric; and
 - coupling said fabric to said first layer of acrylic latex.
27. (Original) A method for manufacturing a blackout and thermal drapery, comprising, in combination, the steps of:
- providing a film having a first side and a second side;
 - metalizing said first side of said film and said second side of said film;
 - providing a fabric having a first side and a second side;
 - coupling said second side of said fabric to said first side of said metalized film; and

AMENDMENT

- 5 -

coating a layer of acrylic latex to said second side of said metalized film.

28. (Original) The method of Claim 27 further comprising the step of flocking said layer of acrylic latex.

29. (Amended) A method for manufacturing a blackout and thermal drapery, comprising, in combination, the steps of:

providing a film having a first side and a second side;

metalizing said first side of said film and said second side of said film for providing a light impermeable metalized film;

providing a first layer of fabric having a first side and a second side;

coupling said second side of said first layer of fabric to said first side of said light impermeable metalized film;

providing a second layer of fabric having a first side and a second side;

and

coupling said first side of said second layer of fabric to said second side of said light impermeable metalized film.
